OUTDOOR

FULL POWER IN ALL WEATHER CONDITIONS

Perfect outfit for hard workers who give their all outdoors

Heavy rain, the sun beating down on your head or a cold wind whistling past your nose: People who work outdoors have to be able to cope with all types of weather. Everyday heroes can still work at full power in all types of weather with the Outdoor range from PLANAM. We know what hard workers appreciate when working outdoors: robust materials that really lock out wind and rain, breathable fabrics that keep their body at comfortable temperature and warm fleece.

All of this is made possible by our high-quality craftsmanship and hard-wearing textiles. Our collection combines functionality and comfort with a strong sense of design. So you always look good at work.

You can master any challenge in the open air with our wide Outdoor range – see for yourself.

PLANAM – Fashion for your profession

Our workwear features optimal freedom of movement and the perfect fit throughout any activities, thanks to the numerous extras such as stretch fibres or adjustable widths. Details such as detachable sleeves or hoods also allow great versatility when temperatures change.

OUTDOOR WINTER

HEROIC ICE AGE

Everyday heroes face particular challenges when it is freezing outside, the wind is icy and daylight fades quickly. With the right clothing the colder months do not matter to them and they can still do great things outdoors.

The PLANAM Winter Collection has been designed to meet the needs of people who work outdoors, even in the snow, rain, cold and darkness. With details like a removable inner lining, high-quality textile coatings or different reflective piping, you are perfectly equipped to tackle the winter season. Move around freely and flexibly in robust, warm workwear.

OUTDOOR WINTER

Air Jacket

Practical and dynamic

With two side pockets and a chest pocket, the jacket has plenty of practical storage space for useful work tools.

Extras

- water-repellent
- 2 side pockets with zip closure
- 1 chest pocket on the right with zip closure
- reflective piping on the front and back
- adjustable drawstring at the waist
- adjustable cuffs
- front zip

New!

A man with a beard and short brown hair is smiling and looking to his right. He is wearing a green softshell jacket with a black strap across his chest and black work pants. He is holding a red and black tool. He is standing next to a red excavator arm. The background shows trees and a clear sky.

OUTDOOR SOFTSHELL

SOFT, WARM AND FUNCTIONAL

People who work hard and move around a lot need clothing that is both lightweight and also breathable to ensure a comfortable body temperature.

The structure of PLANAM soft shell jackets creates a windproof and water repellent outer layer and an inner layer that insulates and dissipates moisture. Another outstanding feature of the softshell jackets are their soft and comfortable fit, offering plenty of freedom of movement. The perfect solution for anyone looking for a compromise between a fleece and winter jacket.

OUTDOOR FLEECE

WORK HARD AND FEEL GOOD

Anyone who needs to work hard in bad weather can look forward to enjoying fleece in their workwear. The functional fabric impresses with its high thermal insulation and light weight.

That's why PLANAM's Outdoor Collection features high-quality fleece clothing that is durable and long-lasting, as well as being very soft on the skin and therefore very comfortable to wear.

OUTDOOR FLEECE

Chipmunk Fleece Jacket

Modern and warm

This jacket is very soft on the skin, particularly in the winter. This is thanks to the pleasant material structure, the front zip closure and its wind and water-repellent properties.

Extras

- windrepellent
- high-tech fleece
- 2 side pockets with zip closure
- 1 chest pocket on the right with zip closure
- front zip
- adjustable drawstring at the waist
- contrasting colour on the collar

FUNCTIONAL UNDERWEAR

UNDERCOVER WORK

Hard workers do not shy away from the rain, cold or snow. With the right foundation, you can keep your body temperature up and keep working even when others are feeling the cold.

PLANAM functional underwear is lightweight, comfortable and cosy – it moves with your body, whatever the task. The high-quality material makes the collection especially breathable and hygienic. Even if you are exposed to severe temperature fluctuations, the underwear keeps your body temperature balanced and is very comfortable to wear.

FUNCTIONAL UNDERWEAR

Set 180 g/m²

Practical and extremely comfortable underwear set

With the combination of cuddly trousers and a comfortable shirt you will be able to brave any fluctuations in temperature: The light viscose mix ensures you have a comfortable body temperature. Contrast stitching and cuffs sets a trendy tone.

ACCESSORIES Fleece Loop Scarf

Never-ending warmth

This lightweight fleece scarf is easy to put on and take off. Thanks to its circular shape, it stays in place with every movement. The drawstring allows you to fix it in place and change it into a hat by drawing it closed.

Extras

- lightweight fleece scarf in a circular, loop shape
- stretchy and smooth
- one edge has a drawstring and therefore allows the scarf to also be worn as a hat
- width approx. 27 cm
- circumference approx. 60 cm

Sizes

ACCESSORIES Knitted Loop Scarf

All-round warmth and comfort

This chunky knitted snood doesn't just look modern – with a width of 40 centimetres, it also nestles perfectly around the neck and keeps you nice and warm.

Extras

- chunky knitted snood
- width approx. 40 cm
- circumference approx. 60 cm

ACCESSORIES Elastic Belt

Flexible and comfortable

All trousers will fit perfectly with this adjustable belt. The high stretch content ensures the perfect amount of freedom of movement. The highlight is in the details: there is a hidden bottle opener on the back of the metal buckle.

Extras

- elastic belt with metal buckle
- completely adjustable with no holes
- comfortable to wear thanks to the stretch content
- width approx. 41 mm
- length can be customised, comes in 2 lengths

Highlight: there is a hidden bottle opener on the back of the buckle.

Lengths

110 cm and 150 cm

Material

70 % polyester
30 % elastane

ACCESSORIES Knee Pad

Well protected and comfortable to wear

The knee pad provides a soft surface when working and protects the knees in accordance with EN 14404. Thanks to the honeycomb structure, it adapts perfectly to the shape of your knee, making it very comfortable to wear. The pad is easy to insert into the knee pockets of PLANAM trousers, dungarees and overalls.

Extras

- knee protection in accordance with EN 14404 Type 2 in conjunction with all PLANAM trousers, dungarees and overalls with knee pockets
- knee pads are easy to insert into the knee pockets
- comfortable to wear and adjusts perfectly to the shape of the knee thanks to the honeycomb structure
- measurements: 25 × 13.5 cm

STANDARDS & CERTIFICATION

STANDARDS & CERTIFICATION

Information note on Personal Protective Equipment (PPE)

Personal Protective Equipment (PPE) provides the wearer with protection. It is subdivided into three categories.

PPE Category I

Protective clothing in Category I protects the wearer from straightforward, personal risks, the effects of which can be safely identified in good time by the user. E.g. Overalls to protect the wearer from dirt. No EC type-examination certificate needs to be issued for protective clothing in Category I.

PPE Category II

This category comprises all PPE which is not assigned to Category I or Category III. It protects people from moderate risk e.g. high-visibility clothing or light heat protection. An external body must certify Category II protective clothing and issue an EC type-examination certificate. This is valid for 5 years.

PPE Category III

Category III includes all PPE that protects against mortal danger or serious irreversible damage to the health of the wearer and where it must be assumed that the user cannot identify the direct effects of the danger in good time e.g. the danger associated with an arc flash or chemical splashes. Certification must also be carried out by an external certifying body. PPE in Category III is also subject to an EC quality assurance system which ensures monitoring and repeats the test at regular intervals. The EC type-examination certificate issued is also valid for 5 years.

Finishing and alteration of Personal Protective Equipment (PPE)

It is particularly important in relation to the finishing of Personal Protective Equipment (PPE) that the type of finish is specifically suited to the PPE type-examination certificate and recertified accordingly. Here too, PLANAM offers a multitude of certified options for attaching your company logo to the PPE. For any modification to the PPE which is not recertified, the type-examination certificate is no longer valid and the complete protection of the wearer is no longer guaranteed.

Important information about the new PPE Regulation

Switch from EU Directive 89/686/EEC to Regulation (EU) 2016/425

From 21 April 2018 type-approval certificates will be issued in accordance with the new PPE Regulation. What are the main changes?

1. Type-approval certificates will be valid for a maximum of 5 years.
2. Subsequent to a transition period of 1 year (from 21 April 2019) PPE will only be allowed to be issued in compliance with the new Regulation. Any merchandise already in circulation may, however, continue to be sold after 21 April 2019 pursuant to Directive 89/686/EEC without limitation for the consumer.
3. Certain PPE, which provide protection against life-threatening injuries, were newly allocated from cat. II to cat. III, e.g. cut protection or PPE that protects against drowning.
4. PPE listed under cat. II and cat. III must continue to be subject to certification by an external body.
5. Any existing certificates pursuant to Directive 89/686/EEC will continue to remain valid up to no later than 20 April 2023. If, however, there is a change in category of the PPE, e.g. cut protection workwear previously listed under cat. II, which is reclassified as PPE under cat. III, the old certificate shall be valid until 20 April 2019.

CE mark

In the Directive 89/686/EEC as well as in the PPE Regulation the mark for PPE is provided with the CE mark. CE means “Conformité Européenne” – “Conformity with EU guidelines”.

- It is a manufacturer’s declaration
- The CE mark is always attached before the product is brought into circulation
- This only affects products which, subject to a certain provision, are required to bear the CE mark
- It is therefore not a voluntary mark
- All PPE listed under cat. I, II and III must be issued with a CE mark

The mark stipulates a minimum safety standard for products. Those products requiring such marking must bear the “CE” mark, in order that they may be brought into circulation at all in the EU.

EN 14058 Protective clothing for a cool environment

For moderately low temperatures, items of clothing are also used for protection against local cooling of the body for indoor activities, for example, in the food industry. In such cases, clothing often does not need to be manufactured in waterproof or air-impermeable materials. The clothing provides protection for the body against cool environments.

EN 342 Clothing for protection against cold

The protective clothing is worn when working in cold storage facilities. To provide optimum protection, the clothing must be worn as a complete outfit (parka – dungarees, blouson – dungarees or overalls), in addition to the correct headwear, hand protection and protective footwear. In the test procedure for EN 342, thermal insulation and air permeability are tested.

The pictogram gives information about the level of protection. The figures below mean, for example, 0.477 (B) resultant thermal insulation measured while standing, performing very light or moderate activities. For the relevant period of use at different ambient temperatures, please refer to the measured value in the following table:

Insulation I cl.r m ² K/W	Wearer performing an activity standing 75 W/m ²		Wearer performing a light activity in motion 115 W/m ²		Wearer performing a moderate activity in motion 170 W/m ²

DIN EN 14404 Knee protection for workers kneeling down

Working in a kneeling position creates constant pressure on the knee. Knee protection is designed to distribute the forces produced evenly across it. In addition to this, it is designed to prevent injuries or damage caused by hard surfaces, small stones or similar objects lying on the ground. Knee protection is subdivided into 4 types:

- Type 1: Knee protection that is separate from clothing and fastened to the leg.
Type 2: Pads inserted into pockets on trouser legs or permanently attached to the trousers.
Type 3: Equipment that is not attached to the body.
Type 4: Knee protection forming part of a unit with additional functions.

In addition to this, there are three performance classifications:

STANDARDS & CERTIFICATION

Level 0: No protection against punctures.
Level 1: The knee protection is suitable for even ground where there is no risk of objects over 1 cm in height.
Level 2: The knee protection is for use in challenging conditions, such as for example when kneeling on stones in mines or quarries.

The PLANAM knee pad product no. 9901027 is certified as Type 2, Level 1 / Level 0 knee protection. This certification only applies in conjunction with PLANAM trousers, dungarees or overalls and cannot be transferred to other products.

Reflective band 3M™ Scotchlite 8912N

3M™ Scotchlite™ Reflective Material 8912N Silver has been designed for use on high-visibility clothing, workwear and professional clothing to improve the visibility of the wearer when it is dark or visibility is poor. The material shines a brilliant white when illuminated by vehicle headlights, even if the wearer is at the edge of the road. Scotchlite™ Reflective Material 8912N Silver is composed of exposed retroreflective lenses bonded to a durable blended fabric (65% polyester / 35% cotton). It far exceeds the minimum retroreflective performance required by the highest category (class 2). Its retroreflective properties are not dependent on the direction the clothing is facing.

3M™ Thinsulate™ insulation

— a modern fibre technology with functional and insulating properties that are setting new standards. The combination of 1-layer polyester padding and 2-layer 3M™ Thinsulate™ insulating finish creates a combination of materials that is unrivalled. The cold doesn't stand a chance here.

The OEKO-TEX® Standard 100 is an independent testing and certification system for raw, intermediate and end products for textiles from all stages of processing. Examples of certifiable articles are raw and dyed/refined yarns, raw and dyed/refined woven and knitted fabrics, ready-made articles (garments of all types, home textiles, bedding, terry towelling, toys made of textiles and many others).

Criteria

Tests for harmful substances cover:

- substances banned by law
 - substances regulated by law
 - chemicals that are known to be potentially harmful to health (but are not yet regulated by law)
 - healthcare parameters
- In their entirety, the requirements go well beyond existing national legislation.

Why OEKO-TEX®?

The OEKO-TEX® Standard 100 was developed in the early 1990s as a response to the need of consumers and the general public for textiles that do not pose a risk to health. Negative headlines such as “Poisons in textiles” were widespread at the time, labelling all chemicals used in the production of textiles as negative and harmful to health stances. Fashionable colours, easy care, long life and many other functional properties are demanded of textiles today and are, to some extent, and depending on their intended use (e.g. for professional and protective clothing), quite indispensable.

UV protective clothing with integrated sun protection

The largest organ of the human body is the skin, and it is exposed to great danger in summer. UV rays from the sun can increase the risk of skin cancer. Standard textiles are radiolucent, providing insufficient protection.
PLANAM's UV-protective clothing gives guaranteed certified safety.

Awarded UV protection certificates “PROTECT 80” and “PROTECT 40”, this range guarantees maximum prevention. Just like for sunscreens, the figure indicates the protection factor for safely spending longer in the sun. Our PLANAM models allow the wearer to remain in the sun 80 and 40 times longer than those without protection. With their integrated sun protection factor, the finished garments provide the skin with optimum protection. Those with sensitive skin can stay in the sun longer without having to cover themselves in sunscreen. It is important to know the individual skin type in order to determine the individual's protection time (length of possible exposure to the sun without risk of skin damage). The stated UV protection factor (e.g. Protect 80) gives the factor by which the individual's protection time can be extended just by wearing these textiles.

Initiative for compliance with social standards in producing countries

PLANAM has joined the social fairness initiative (sozial-fair) set up by the Association of Non-food Importers (Verband der Fertigwarenimporteure: VFI). This obliges our suppliers to comply with the conditions of sozial-fair, to ensure a socially fair, humane environment for working conditions in both their own manufacturing facilities and in those upstream.

We are conscious of our social responsibilities and support international regulations with regard to child labour and the prohibition of forced labour. Furthermore, we require our suppliers to set minimum standards in workplace health and safety and to ensure working hours and remuneration comply with statutory provisions or collective agreements and that freedom of association is granted.

PLANAM confirms and documents compliance with standards for both its own company and for its upstream suppliers and presents the relevant documentation both generally to the authorised VFI auditors and on an individual and contract-related basis to participating companies.

This means we can guarantee our suppliers manufacture responsibly, on the basis of social standards.
For more information, see www.sozial-fair.eu.

CARE INSTRUCTIONS

CARE INSTRUCTIONS

Washing

This symbol indicates whether or not the item can be washed at home and applies to both hand and machine washing. The numbers in the washing tub correspond to the maximum washing temperature in degrees Celsius; these maximums must not be exceeded. A bar underneath the tub indicates a mild treatment with reduced washing volume and lower spin speed.

 Normal wash	Boiling wash For items made, for example, of cotton or linen, which are white, boil-proof, dyed or printed. Completely fill the drum. Use the relevant washing programme.
 Normal wash	60°C colour wash Non boil-proof coloured fabrics, for example, cotton and polyester, as well as mixed fabrics. Use the relevant washing programme.
 Normal wash	40°C colour wash Wash cycle for things such as dark coloured items made of cotton, polyester, blended fabrics, etc. Use the relevant washing programme.
 Gentle cycle	40°C easy-care “Easy-care” items, for example, those made from synthetic fibres (acrylic, polyester and polyamide). Reduce the volume of laundry (drum up to half full). Use the relevant washing programme. Do not spin or use only a short spin to avoid creases.
 Normal wash	30°C colour wash Wash cycle for things such as dark coloured items made of cotton, polyester, blended fabrics, etc. Use the relevant washing programme.

 Gentle cycle	30°C easy-care “Easy-care” items, for example, those made from modal, viscose or synthetic fibres (acrylic, polyester and polyamide). Reduce the volume of laundry (drum up to half full). Use the relevant washing programme. Do not spin or use only a short spin to avoid creases.
 Gentle cycle	30°C Delicates / Wool Wash. Items made, for example, of machine washable wool. This washing cycle is characterised by a particularly gentle treatment process. Significantly reduce washing load (only fill the drum up to a third). Use the relevant washing programme.
 Do not wash	Do not wash Any items bearing this label may not be washed. They may react adversely to moisture, or due to their size are unsuitable for washing in a household washing machine.

Bleaching

The triangle indicates whether the item of clothing may be bleached or not.

 Chlorine or oxygen bleaching	All bleaches The empty triangle is the symbol for chlorine or oxygen bleaches.
 Do not bleach	Oxygen bleaching Only oxygen bleaching (contained in universal detergents) is permitted, but not chlorine bleaching.
 Do not bleach	Do not bleach The open crossed triangle indicates that bleaching is not possible. Only use bleach-free washing agents.

Tumble dryer

The square is the symbol for the drying process. The circle inside it indicates drying in the tumble dryer. The dots in the drying drum indicate the drying stages. In the absence of the tumble dryer symbol, signs relating to the washing and ironing of the item provide certain instructions for drying. The more intensive the permissible type of treatment, the easier the item is to dry; the lower the washing temperatures, the more care needs to be taken when drying in the tumble dryer. At present, not all devices have programme text which tells you which textiles can be dried in the tumble dryer.

General instructions for drying clothes in a household tumble dryer

- Before drying, spin the laundry at the maximum possible spin speed as indicated by the washing symbol.
- Do not overfill the tumble dryer drum.
- Put items with the same drying duration in the tumble dryer together. For example, cottons and synthetics have a different drying duration and will therefore retain some residualmoisture after different drying times.
- Do not over-dry laundry as this consumes energy unnecessarily.
- Do not put shape and heat-sensitive items in the tumble dryer.
- Always pay attention to the manufacturer’s instructions.

 Normal drying	Normal drying It is possible to dry the item in the tumble dryer in a normal load without restriction.
 Gentle drying	Gentle drying Take care when drying in a tumble dryer. Select a gentle treatment with a reduced drum load (temperature, duration)
 Do not tumble dry	Do not tumble dry Item cannot be dried in the tumble dryer.

Ironing

The dots indicate the iron’s temperature range (control, steam, travel irons and ironing machines). These setting ranges are also sometimes assigned raw materials for the ironing devices in use. Follow the maximum temperature shown on the care label and not that of the raw material composition of the textile item.

 Hot iron	Hot iron Also corresponds to the iron temperature level “cotton/linen”: Damp iron the item, moisten if necessary. Iron shine or pressure-sensitive items by placing a cloth between the item and the iron or iron the garment inside out. Steam irons may be used.
 Warm iron	Warm iron Also corresponds to the iron temperature level “wool/silk/ polyester/viscose”: Iron by placing a slightly damp cloth between the iron and the clothing. Steam irons may be used. Avoid strong pressing. Iron flat.
 Cool iron	Cool iron Also corresponds to the iron temperature level “acrylic, polyamide (nylon), acetate”: Iron shine or pressure-sensitive items by placing a dry cloth between the item and the iron or iron inside out. Be careful when using a steam iron (iron without steam). Iron flat.
 Cool iron	Do not iron Detrimental changes which cannot be rectified can be expected if the item is ironed.

CARE INSTRUCTIONS

Professional textile care

The circular symbol indicates whether or not an item requires professional textile care. On the new care label, both organic solvents and special aqueous processes are included, thereby differentiating between dry cleaning (formerly chemical cleaning) and wet cleaning.

Dry cleaning

The letters in the circle are primarily intended for professional textile cleaners. They primarily provide information about solvents. The bar beneath the circle indicates that the mechanical load, moisture applied, washing and/or drying temperature must be reduced when cleaning. When selecting the cleaning method, the professional must also take into account the characteristics of the textiles and their degree of soiling (normal/special cleaning).

	<p>Treatment in a cleaning machine with the following solvents: Perchloroethylene, hydrocarbons</p> <p>Normal cleaning procedure without restriction. Commercially available stain removers based on solvents can be used with some limitations. Test out on a concealed area before use.</p>
	<p>Treatment in a cleaning machine with the following solvents: Perchloroethylene, hydrocarbons</p> <p>Cleaning methods with strict limitation on adding moisture and/or the mechanical load and/or the temperature. Commercially available stain removers based on solvents can be used with some limitations. Test out on a concealed area before use.</p>
	<p>Do not treat with solvents</p> <p>Do not dry clean. Do not use a stain remover that contains solvents.</p>

Notes

The label has information on the maximum permitted treatment and proper care of the textiles. The care label is not a quality guarantee. Care carried out in accordance with the information on the label guarantees that the textile item does not become damaged. It does not, however, guarantee that all soiling and stains will be removed. Milder treatments and lower temperatures than those shown on the label can be carried out or utilised at any time.
